

Remote Healthcare Workforce Management System
Technology To Bring Healthcare Home

It's Real... It's Reliable... It's Revolutionary... It's myOnsite™.

myOnsite System Benefits:

- Comprehensive solution for remote healthcare workforce management
- Comprehensive and configurable to handle any type of modality of the in-home visit including phlebotomists, nurses, technicians, and other types of healthcare providers
- Cloud-based technology: accessible on the web and smart devices
- Clinical practice monitoring from any location
- Convenient HL7/FHIR/API interface for interoperability with your other IT systems
- Real-time visibility of location and progress of each staff
- Full audit of each step in the workflow to ensure on-time service
- Support point of care at-home testing
- Integrate field-collected data into your EMR
- Up-to-date status and result notifications
- Easily review patient assignments and scheduling
- Increased workflow transparency and operations
- 100% Scalable, reliable, and flexible platform
- Completely customizable for individual specialty needs
- Enhanced communication among providers
- Improved visibility of the comprehensive patient health status
- Eliminates specimen labeling errors and provides continuous specimen tracking
- Reduces the workload of site staff

Field Team Management

Take the pain out of managing your team of healthcare workers in the field. Our advanced system can be used for the management of all types of specialists including phlebotomists, nurses, technicians, and other types of healthcare providers.

Seamless Integration

myOnsite supports industry-standard protocols such as HL7, API, XML, and X12 and can be integrated with other information systems (HIS/LIS/Blood Bank, Pharmacy). Integrate our system with utility features provided by myOnsite and/or to accelerate management oversight of your own patient services.

Scalable, Reliable and Flexible

myOnsite is designed to utilize modern cloud computing technology to handle an unlimited capacity of service features that vary in complexity. The information system works with your clinical practice to provide a comprehensive workforce system that can be expanded on at the rate and utility needs of your practice and patients.

Customization

myOnsite is highly customizable with the central goal to offer a unique platform designed for each client. Customize everything from information system set up, service features to the bar code labels that are specific for your site.

Enhance Workflow Operations

myOnsite delivers better patient care and management by providing up-to-date notifications on patient healthcare orders including testing and diagnostics.

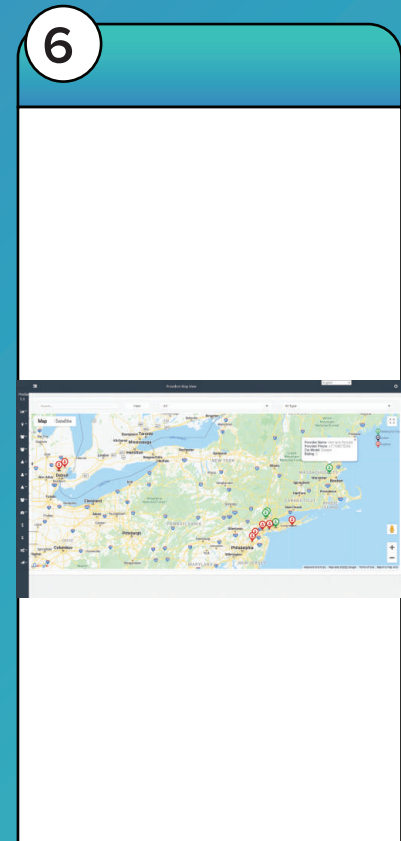

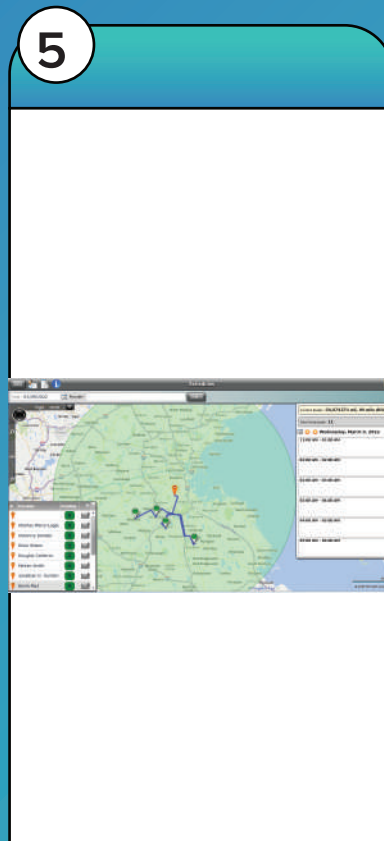

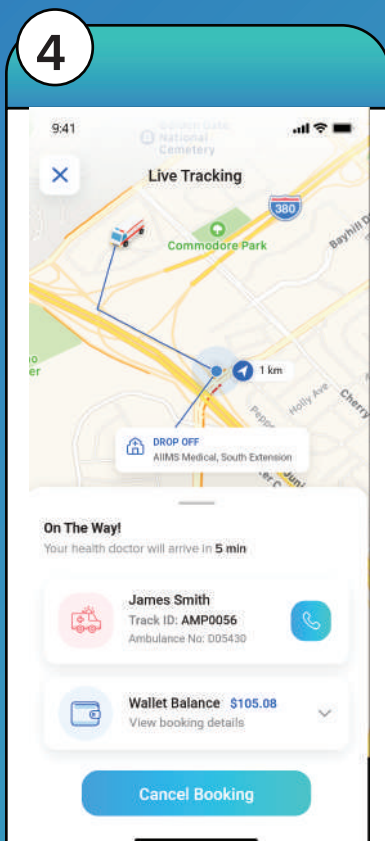

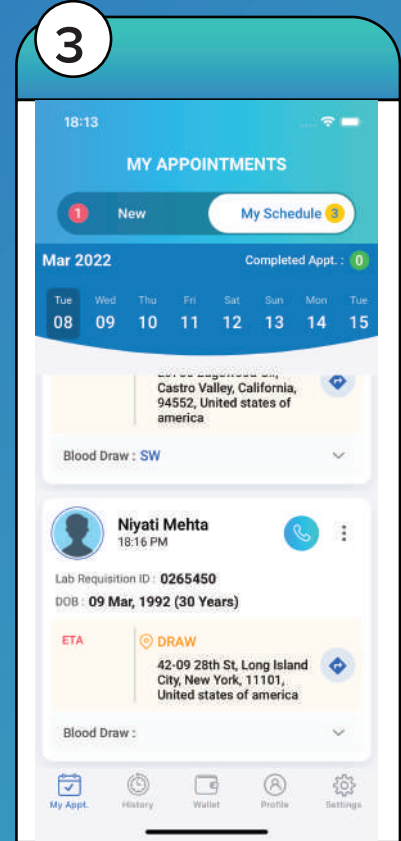

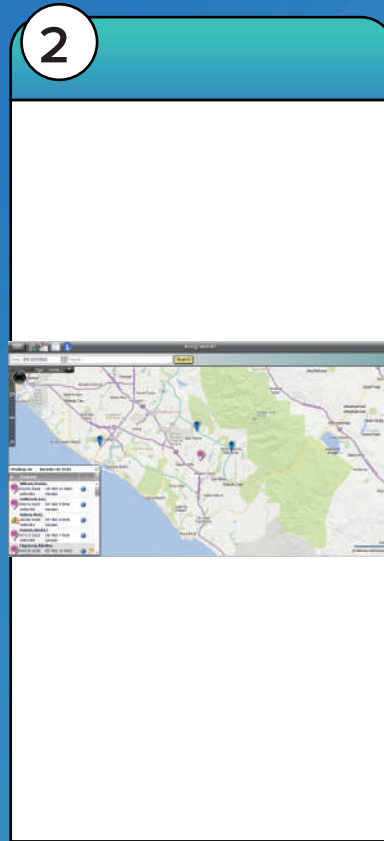

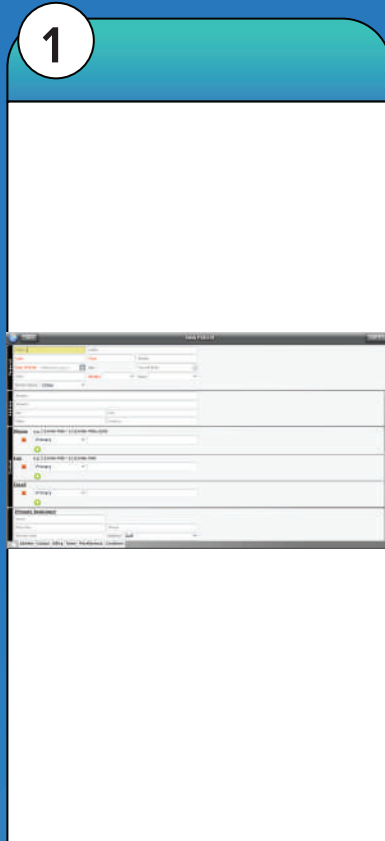

Revenue Enhancement

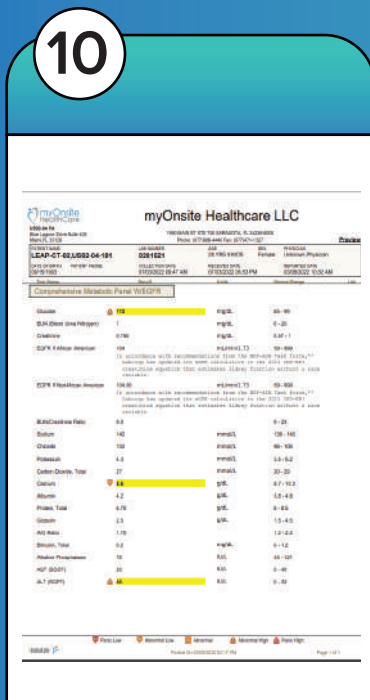

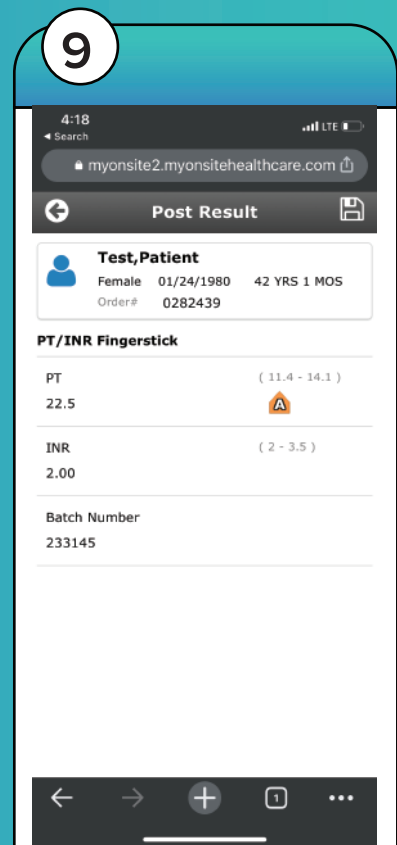

Each myOnsite application module has a proven return on investment, is designed to reduce labor costs and free up highly skilled staff to focus on patient care.

Quality Assurance and Regulatory Compliance

myOnsite is designed to maximize compliance with HIPAA, FDA and JCAHO guidelines. The system is continually updated and enhanced to meet ever-changing regulatory guidelines.

Completely Integrated Workflow

myOnsite Technology Benefits

MYONSITE REMOTE WORKFORCE SOLUTION

TECHNICAL SPECIFICATIONS

Cloud

myOniste is designed to run on the Cloud Service platform which is universally supported. Microsoft Dot Net technology allows your organization to run private or public cloud platform providing scalability to millions of transactions per day.

Accessibility

Access the platform virtually anywhere with any device using multi-level security and authentication metrics.

Capacity

With cloud computing, capacity limitations are no longer relevant. myOnsite is designed to automatically add computing and storage resources as required for virtually unlimited capacity.

Support services

A 24-hour system support center is available for any issues or questions that may arise. Our support teams can remotely access your system via secure VPN and provide system diagnostics in the event of an error to assist you with a solution.

A COMPREHENSIVE HEALTHCARE WORKFORCE MANAGEMENT SOLUTION

myOnsite is a comprehensive healthcare information system that is driving the integration of advanced technology to enhance practice workflow, operational efficiency and patient services, ultimately improving quality-of-care standards for patients across all healthcare fields.

The comprehensive system allows for a multitude of independent services to be run all within the same platform. Specifically, the platform is designed to enable customized access to digital management of practice workflow, mobile phlebotomy, and healthcare services.

The platform provides access to current and expanding myOnsite mobile healthcare services while allowing the flexibility of integrating management for your own remote services (e.g., mobile x-ray, wound care, home and wellness visits, IV infusions).

Mayank Trivedi

CEO and Founder

Mr. Trivedi has over twenty-five years of proven track record of innovative and high-energy leadership, including establishing, developing, growing, and operating healthcare information technology and services companies.

With a focus on strategic growth markets, spotting market opportunities and ceasing first-mover advantage Mr. Trivedi has assembled a portfolio of companies to provide on-demand on-site integrated clinical diagnostic services and drug-testing services.

Mr. Trivedi has successfully negotiated a series of strategic partnerships with various industry segments. Mr. Trivedi is also active in venture funding of early-stage technology and services companies.

Company profile

Founded in 2008, myOnsite Healthcare is a leading provider of advanced technology solutions that are revolutionizing remote workforce management, mobile healthcare testing, and clinical research services in the healthcare field. Founded by leaders in the software, technology, and healthcare industries, myOnsite strives to fill the gaps in the continuum of patient care by optimizing healthcare practices through the integration of multi-collaborative technology-driven approaches.

myOnsite Mission:

- To extend the benefits of digital health with physical services for patients at home.
- To support healthcare at home initiatives across healthcare and life sciences with the most flexible remote healthcare workforce management system.
- To enable integrative healthcare services that improve access, utility, convenience to benefit the patients at home.
- To facilitate the integration of high-quality mobile phlebotomy, diagnostic, telemedicine, and research services into standards of care.

myOnsite Vision:

Healthcare should be more patient-centric with healthcare services being delivered to patients at home. Digital health brings a lot of benefits to patients. Actually providing services at home is critical to delivering the full benefits of digital health. myOnsite is committed to delivering services to patients at home like mobile phlebotomy as well as providing our technology solutions to other provider organizations so they can deliver other services to patients at home
